SuperCapSRTM
Heat-Reflective Color Technology

Reflects up to 76%
of infrared light

Born from military infrared reflective technology, the SuperCapSRTM color coating is designed to prevent profile distortion due to heat build-up caused by high outdoor temperatures.

The co-extruded colorant system creates a molecularly fused color layer that becomes an integral part of the profile. Unlike painted vinyl, the tough acrylic bronze color layer is scratch resistant and extremely durable.

Casement and Awning Features

- 3-1/4" frame depth
- Multi-chambered frame
- Low E glass with Intercept[®] spacer
- Exterior perimeter weather-stripping
- Folding handle
- Multi-point hardware
- Dual-foam compression bulb seals
- 5 frame styles

Customize your HomeMaker3 windows with decorative and efficient options.

Standard Glass Package

Glass Options

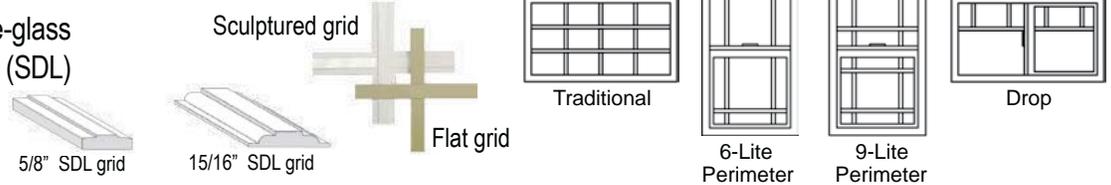

Low E insulated glass packages are a great option to help you reduce your heating and cooling costs. In warm weather, Low E glass reduces solar heat gain, minimizes interior glare and lowers inside glass temperature, saving energy. In cool weather, Low E glass provides outstanding thermal performance with warmer inside glass surfaces to help save energy.

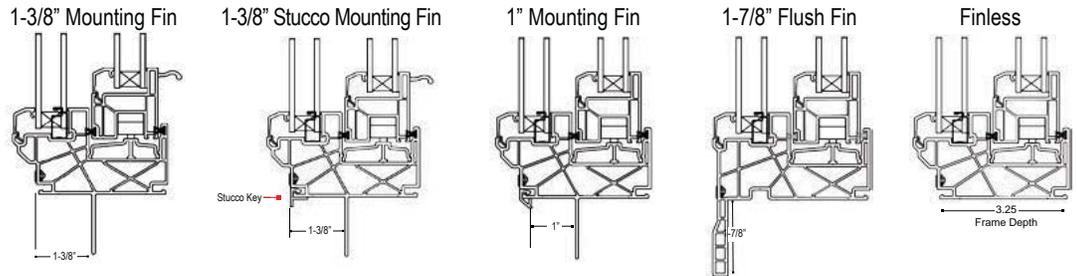

Grids

Flat and sculptured between-the-glass (BTG) and Simulated Divided Lite (SDL) grids are available in standard and custom patterns.

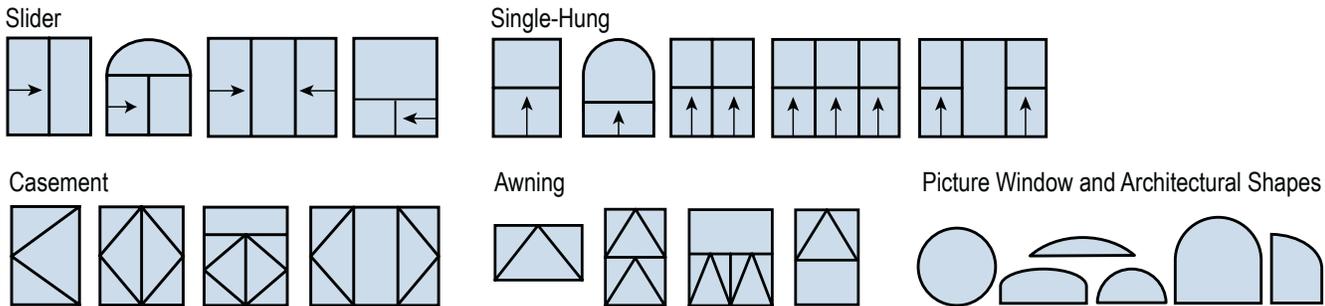

Frame Styles

Five frame styles provide HomeMaker3 windows with enough versatility to be easily installed in all replacement and new construction projects.
